

PSS is a third party professional safety consulting firm that offers safety services in a broad range.

Some of our most often requested services include but not limited to:

- 1) **OSHA “MOCK” audits** – These are thorough walkthroughs of jobsites, plants, etc. identifying OSHA citable and good practice deficiencies while also noting compliance efforts. This includes recordkeeping, training, and visual site efforts with a full detailed written report with photos and correction action items listed with matching OSHA standards.
 - 2) **Training** – ranges from basic, awareness, and competent training in almost every subject needed on a jobsite. i.e. electrical, fall, excavation, crane, rigging, PIT, fit testing, etc.
 - 3) **Accident investigation** – We have a team of highly trained professionals with years of experience in accident/incident investigation. Furthermore, we have 2 CSPs on staff that can be, and have been, “expert” witnesses when needed.
 - 4) **OSHA informal conference** – We are the Employer advocate. We are trained to assist with OSHA on-site, informal, and further interactions when needed.
 - 5) **Risk Management** – We assist with safety culture, management safety training, and OSHA log review to show trends with our recommendations.
 - 6) **Ergonomic Specialist** – We assist with identifying and addressing ergonomic issues in the workplace by providing reports and training follow-ups.
 - 7) **Machine Guarding** – We conduct machine guarding assessments for plants, Rock quarries, etc.
 - 8) **LOTO** – We perform LOTO assessments to create procedures for plants and other facilities.
 - 9) **Written Safety Programs** – We are specialists at writing safety programs for hundreds of clients.
 - 10) **SSSP/JSA/JHA** – We have an in-house safety specialist that writes SSSP, JSA, JHA, etc. for clients working with specific and generic formats.
 - 11) **PPE assessments**- We conduct PPE assessments and front end site setups for job start-ups and facilities.
 - 12) **Retainers**- We offer clients of all sizes, facilities, etc. a monthly retainer agreement where we “partner” with the client as a third-party consulting firm assisting them with specialized safety needs, questions, site audits, etc. We have over 90 clients on this program currently.
 - 13) **CMTrain/CMHire**- We offer excellent and affordable online SITE-SPECIFIC training that is custom built for each client (utilizing OSHA modules and their own site-specific module), so that new hire/annual training is easy to complete and OSHA compliant. It is designed to help monitor current training through a user-friendly database. Contractors can be assured that their subcontractors will be taught efficiently and that the site training efforts through the multi-employer rule has been met.
 - 14) **Safety Monitoring**- We place full-time safety professionals on construction projects or in plants to assist with a variety of safety roles. These projects can be short term, or run the duration of the work.
